

## GAMES

March 29

### DIY BALANCE BEAM

Put a ball in a stocking. Line up cups and let kids knock them over without using their hands. Give them a time limit to see how many they can knock over.

## **GAMES**

### **Commands R' Us**

Fun music and a way to start and stop the music quickly.

This is a fun and unique game that kids love to play! The players have to stop when the music stops and find a partner to complete the command.

Have all the players for the game stand in a large circle. Start to play the music and have all the party guests walk around the circle in a clockwise motion.

Turn the music off and yell out a command. When the players hear the command, they have to find a partner from across the circle and complete the command.

The last players to pair up and complete the command are out and the game begins again with the start of the music.

The commands are: (add as many as you like)

- Jump like a bunny
- Hop on one foot
- Tap your head while you hop on one foot
- Spin in a circle
- Leap frog over each other

### **Don't Touch the Ground!**

Give each child a blown-up balloon and designate a start and finish line. On the word 'go', each child must hit his/her balloon in the air and hit it to the finish line. If the balloon touches the ground, the child must go back to the start. No holding the balloon allowed! The first child across the finish line wins!

If you want to make this game harder for older children, the referee can call out different positions for the child to compete in, such as crab walking or hopping on one foot, or have the children only hit the balloon with their heads or their feet.
